

Jessica Kang

Full-Stack Web Developer

Profile

I remember writing my first line of HTML code in 2003. I was 12 at the time, and didn't think much of it. When I clicked that refresh button and 6 seconds later, my background turned pink... I knew this was something interesting. I decided to change careers and join web development for this exact reason - I enjoy watching things emerge on a page when you press Command -R. The ceiling is limitless in web development, and that is what motivates me, knowing that there's always more to know.

Skills not related to my career: I ski, sew, watch an unnecessary amount of space films and learned how to use a bow and arrow after watching 'The Hunger Games'.

Experience

General Assembly

April 2016 - July 2016

- Walkr - An app using Ruby on Rails to help you find dog walkers in your area.
- Truth - A chat app using Backbone.js and WebSockets that takes a photo of you and updates your profile picture every time you send a message or press backspace.
